Internship

iServeU Technology pvt. ltd.

- I have completed 3 month internship at iServeU technology as a Backend Developer Specialization in Java SpringBoot , Created Api , Learned how to write testcases using junit and mockito . I

Projects

- Created an api for upi switch to receive request from client and again prepare request as per bank requirement and send the newly created request body to the bank service.
- Created a config file to skip the ssl certification to deal with https server .
- Deployed the upi switch application on apache tomcat for testing
- Used marshalling for convert json data into xml format .
- Created and api for a bank to initiate vpa request using encryption and decryption .
- Implemented Secret Manager for bank service
- Created a Bank simulator , while testing locally we are not able the access the bank directly so I created for locally testing purpose .
- Consumed Api using RestTemplate .
- Written 100+ testcases using junit and mockito .
